

CERTIFICATE OF ANALYSIS

HUMAN PROTEINS

Human Kininogen (Low Molecular Weight)

Product code: P261-1

Batch No:

Product presentation: Single homogenous batch, supplied lyophilised in 10mM sodium acetate buffer, pH 5.5, containing 0.2M NaCl.

Purity: Nominally > 95% by SDS-PAGE.

Source material: Human plasma. Starting material tested and found negative for HIV I & II antibodies, Hepatitis B surface antigen and Hepatitis C antibodies.

Storage: Store at 2-8°C.

Analysis

SDS-Polyacrylamide Gel Electrophoresis.

Total protein concentration as determined by optical density at 280nm using $E_{0.1\%}^{1\text{cm}} = 0.59$.

Specifications

Band corresponding to molecular weight of Kininogen.

>0.1 mg/ml.

Results

mg/ml.
